

Candidate for the position of President of the Kaunas University of Technology Students' Association

LUKAS KIJAUSKAS

Operational Guidelines

Back in the past, KTU SA had a very clear purpose - students needed fun events and entertainment, because these were scarce in the city of Kaunas. Students wanted various benefits, new friends and acquaintances. They were concerned with their thoughts and ideas being heard by the authorities, so KTU SA used to look after this matter. Today, the expectations of the students, for which we exist, have partly changed. Students now want **us** to know what they need, they want **us** to provide them with useful and understandable information. It is true that some of them do not even have expectations for us anymore, therefore it is our natural goal to **bring back** the trust of our students and help them form their expectations for us.

Furthermore, today KTU SA is a large organization and, accordingly, it is given a lot of time and attention to be kept running. An absolute majority of activities are focused on the development and growth of existing members' competency, leisure time or other low added value initiatives for students. This indicates poor management of the organization and attitude differences towards the organization's purpose. So, here we are faced with the **desire to develop** a united work culture based on the mission of KTU SA among the members of the organization.

- Adaptation of strategic management
- Optimizing financial and bureaucratic processes
- Systemic supervision of senators' activities
- Public Relations - Competence of KTU SA
- Productive and centralized integration of new members
- KTU SA mission-based organization culture
- Recommended team rotation methodology

Non-organizational changes

- Connecting students and lecturers
- Increasing the availability of student learning tools at the university
- A system for monitoring organizational activities oriented towards student expectations

Students

- Bachelors
- Masters
- International
- Special needs

Innovative study of needs

University's Administration

The implementation of initiatives for student well-being

Municipality

The implementation of infrastructure initiatives for students

Business sector

Sponsoring for activities

KTU SA,

in collaboration with the academic community and external partners,

initiates changes based on student's interests,

provides feedback

and educates self-representing students.

- Familiarize students with basic information - FAQ
